Offshore Havens: Using an International Entity for Asset Protection

Arnold S. Goldstein

Offshore Havens: Using an International Entity for Asset Protection Arnold S. Goldstein

International entities allow for many advantages over domestic entities. The first and foremost is that your money is safer and further away from your domestic creditors. International entities are harder to reach than domestic entities. Often the International law governing these assets favor the debtor rather than the creditor. Many countries require high bonds for lawsuits and have many other debtor friendly laws making it expensive and inconvenient for creditors to reach your internationally placed assets.

Offshore Havens introduces readers to International Banking as well as answers common questions everyone has about International banking. This book includes a country-by-country guide comparison of the different countries or "havens" that you can protect your assets with and which havens should be avoided.

Discover the world of international investments and how to protect assets abroad with Offshore Havens!
