Stalingrad: The Air Battle: 1942-January 1943 Christer Bergstrom

Following the harsh winter of 1941/42, the Germans renewed their offensive operations across the entire Eastern Front once the spring thaw had set in. As in 1941, they made significant advances, particularly on the southern half of the front, penetrating to the River Volga and the city of Stalingrad. The battle for Stalingrad was undoubtedly one of the turning points in the war. Before the German defeat there and at the battle of El Alamein, they had never been beaten. After these defeats, the Germans never again achieved a significant victory. While the land battle for Stalingrad is well known, the air battle fought by the Luftwaffe and the Soviet air force is less well documented but was very important in determining the ultimate fate of the city and the opposing combatants.

This book covers the significant air battles which took place over Stalingrad between August and November 1942 and the subsequent airlift operation in the winter of 1942/43 intended to relieve the German Sixth Army, which was by then trapped in Stalingrad. It also covers the air war during the Russian counter-offensive in early 1943 where the Luftwaffe played a major role in saving the whole German Eastern Front (and thus the whole German war effort) from collapsing. This is an aspect of the war in the East that has previously not been covered in such depth. The strength of the author's writing lies in its detail and his ability to tell the story from the viewpoint of both sides.
