Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics

Helmut J. Fischbeck, Kurt H. Fischbeck

The second edition of "Formulas, Facts and Constants" has been enlarged without undue increase in volume. The constants have been revised to 1986 values. Prompted by comments of many readers a section on error analysis has been added. Most importantly, the new edition now has a subject index in addition to the detailed Table of Contents. The basic format has not been changed and the aim of the book remains to be a handy source of formulas, conversion factors and constants for everyday use. Fundamental tools of mathematics needed in all areas of the physical sciences are given in Section 1. Conversion factors and fundamental constants are listed in Section 2. Section 3 gives information on terms and facts of spectroscopy and atomic structure. Section 4 reviews basic elements of wave mechanics. Section 5 is a resource for work in the laboratory and is intended to be of assistance in the use of frequently encountered equipment such as electronic devices, detectors, vacuum systems, etc. Material constants and other data frequently needed for estimates and problem solving are provided. This new edition is dedicated to the memory of my father, Kurt Fischbeck, who was instrumental that this book was written in the first place. I have benefitted from his experience as an editor and author. He died shortly before the first edition appeared in print. I wish to thank my colleagues Jack Cohn and Stewart Ryan for their useful comments.

From reader reviews:

Angel Gardner:

This Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics book is not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is actually information inside this publication incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. This Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics without we realize teach the one who looking at it become critical in thinking and analyzing. Don't become worry Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics can bring when you are and not make your carrier space or bookshelves' grow to be full because you can have it in the lovely laptop even mobile phone. This Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics having very good arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Billie Gould:

People live in this new morning of lifestyle always try and and must have the time or they will get large amount of stress from both way of life and work. So , whenever we ask do people have free time, we will say absolutely without a doubt. People is human not really a robot. Then we question again, what kind of activity do you have when the spare time coming to anyone of course your answer will unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, the actual book you have read is Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics.

Amy Christensen:

Do you have something that you want such as book? The e-book lovers usually prefer to choose book like comic, short story and the biggest one is novel. Now, why not seeking Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics that give your satisfaction preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the way for people to know world better then how they react when it comes to the world. It can't be said constantly that reading routine only for the geeky man but for all of you who wants to always be success person. So , for all you who want to start reading through as your good habit, it is possible to pick Formulas, Facts and Constants for Students and Professionals in Engineering, Chemistry, and Physics become your starter.

Joaquin Bedard:

With this era which is the greater individual or who has ability in doing something more are more valuable than other. Do you want to become one among it? It is just simple method to have that. What you need to do is just spending your time not very much but quite enough to possess a look at some books. Among the books in the top record in your reading list is definitely Formulas, Facts and Constants for Students and

Professionals in Engineering, Chemistry, and Physics. This book and that is qualified as The Hungry Hills can get you closer in turning into precious person. By looking upward and review this book you can get many advantages.
