This book provides a comprehensive introduction to the conversational interface, which is becoming the
main mode of interaction with virtual personal assistants, smart devices, various types of wearable, and
social robots. The book consists of four parts. Part I presents the background to conversational interfaces,
examining past and present work on spoken language interaction with computers. Part II covers the various
technologies that are required to build a conversational interface along with practical chapters and exercises
using open source tools. Part III looks at interactions with smart devices, wearables, and robots, and
discusses the role of emotion and personality in the conversational interface. Part IV examines methods for
evaluating conversational interfaces and discusses future directions.
