It is important to have a good computer setup. Minecraft is famous for the way it eats up your RAM. Before you decide to get involved in a PvP game, check the specs on your computer. Here, the minimum system requirements are probably not too difficult to meet. However, if you want a flawless performance from your game, you should try to get computer system that has 4 GB of RAM or higher, a fast processor, and a great graphics card as well. If you fail to follow this tip, you may experience lags in the game, which could very well be the death of your game character
