## **Cellular Manufacturing Systems: Design, planning and control** N. Singh, Divakar Rajamani

Batch manufacturing is a dominant manufacturing activity in the world, generating a great deal of industrial output. In the coming years, we are going to witness an era of mass customization of products. The major problems in batch manufacturing are a high level of product variety and small manufacturing lot sizes. The product variations present design engineers with the problem of designing many different parts. The decisions made in the design stage significantly affect manufacturing cost, quality and delivery lead times. The impacts of these product variations in manufacturing are high investment in equipment, high tooling costs, complex scheduling and loading, lengthy setup time and costs, excessive scrap and high quality control costs. However, to compete in a global market, it is essential to improve the productivity in small batch manufacturing industries. For this purpose, some innovative methods are needed to reduce product cost, lead time and enhance product quality to help increase market share and profitability. What is also needed is a higher level of integration of the design and manufacturing activities in a company. Group technology provides such a link between design and manufacturing. The adoption of group technology concepts, which allow for small batch production to gain economic advantages similar to mass production while retaining the flexibility of job shop methods, will help address some of the problems.

### **From reader reviews:**

#### **Stephen Hilton:**

Here thing why this particular Cellular Manufacturing Systems: Design, planning and control are different and reputable to be yours. First of all reading a book is good but it depends in the content than it which is the content is as delightful as food or not. Cellular Manufacturing Systems: Design, planning and control giving you information deeper and different ways, you can find any book out there but there is no guide that similar with Cellular Manufacturing Systems: Design, planning and control. It gives you thrill reading through journey, its open up your personal eyes about the thing in which happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in park, café, or even in your approach home by train. In case you are having difficulties in bringing the published book maybe the form of Cellular Manufacturing Systems: Design, planning and control in e-book can be your choice.

#### **Randy Scott:**

Now a day folks who Living in the era just where everything reachable by connect to the internet and the resources inside can be true or not involve people to be aware of each data they get. How people have to be smart in receiving any information nowadays? Of course the answer is reading a book. Reading a book can help people out of this uncertainty Information particularly this Cellular Manufacturing Systems: Design, planning and control book since this book offers you rich information and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you know.

#### **Dan Villanueva:**

Playing with family in a very park, coming to see the water world or hanging out with friends is thing that usually you may have done when you have spare time, after that why you don't try point that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Cellular Manufacturing Systems: Design, planning and control, you may enjoy both. It is fine combination right, you still need to miss it? What kind of hang type is it? Oh seriously its mind hangout people. What? Still don't obtain it, oh come on its identified as reading friends.

#### **Donna Hubbard:**

Don't be worry should you be afraid that this book may filled the space in your house, you might have it in e-book method, more simple and reachable. That Cellular Manufacturing Systems: Design, planning and control can give you a lot of good friends because by you looking at this one book you have issue that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This book offer you information that might be your friend doesn't know, by knowing more than different make you to be great men and women. So , why hesitate? Let me have Cellular Manufacturing Systems: Design, planning and control.
