Fractal Cosmos 2014 Wall Calendar Alice Kelley

Fractals are the visual depictions of mathematical equations the same equations, in fact, that describe natural phenomena such as coastlines, plant shapes and weather patterns. A computer program assigns a color to each point in the image based on the answers to a chosen equation, which then results in abstract fractal shapes. Dozens of variables are manipulated in order to create these fascinating images. The Fractal Cosmos wall calendar features the organic designs of Alice Kelley, who says, "Fractals are an intuitive glimpse into the infinite order that composes the natural world, as well as being proof that math is beautiful."
