A Glimmer of Light From the Eye of a Giant: Tabular Evidence of a Monument in Harmony with the Universe Joseph Turbeville

An awareness and appreciation of the beauty of symmetry and harmony that can be found in all of nature must surely have been responsible for the intuitive leap of the author's imagination to cause the creation of these mathematical tables. Number summations and symmetrical combinations discovered in the tables represent many of the exact measurements made at the Great Pyramid of Giza. Other numbers that occur continually in the tables represent physical earth measurements of such things as size, density, angular velocity, and rotational energy, or harmonics thereof.

There were some synchronistic events involved in the creation of this book and the author has chosen to show such happenings as side notes in the Appendix in order to minimize any aura of mysticism that might be cast over these tables.

For an autographed copy of the book, or for more information, visit the author's website at www.eyeofagiant.com.

Joseph's second book with Trafford, *New Tabular Evidence of a Monument in Harmony with the Universe*, is also available for sale here.
