## **Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison (The David Hume Series)** David Sankoff, Joseph Kruskal

Time Warps, String Edits and Macromolecules is a young classic in computational science. The computational perspective is that of sequence processing, in particular the problem of recognizing related sequences. The book is the first, and still best compilation of papers explaining how to measure distance between sequences, and how to compute that measure effectively. This is called string distance, Levenshtein distance, or edit distance. The book contains lucid explanations of the basic techniques; well-annotated examples of applications; mathematical analysis of its computational (algorithmic) complexity; and extensive discussion of the variants needed for weighted measures, timed sequences (songs), applications to continuous data, comparison of multiple sequences and extensions to tree-structures. This theory finds applications in molecular biology, speech recognition, analysis of bird song and error correcting in computer software.

### **From reader reviews:**

#### **Marla Mestas:**

What do you regarding book? It is not important to you? Or just adding material if you want something to explain what the ones you have problem? How about your free time? Or are you busy person? If you don't have spare time to perform others business, it is make you feel bored faster. And you have time? What did you do? Everybody has many questions above. They have to answer that question simply because just their can do that will. It said that about book. Book is familiar on every person. Yes, it is right. Because start from on pre-school until university need this kind of Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison (The David Hume Series) to read.

#### **Joseph McNeal:**

Spent a free time and energy to be fun activity to do! A lot of people spent their free time with their family, or their own friends. Usually they performing activity like watching television, going to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Might be reading a book might be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the publication untitled Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison (The David Hume Series) can be fine book to read. May be it may be best activity to you.

#### **Edward Baca:**

Playing with family in a park, coming to see the ocean world or hanging out with friends is thing that usually you may have done when you have spare time, then why you don't try factor that really opposite from that. I activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison (The David Hume Series), you may enjoy both. It is fine combination right, you still desire to miss it? What kind of hang type is it? Oh come on its mind hangout folks. What? Still don't have it, oh come on its referred to as reading friends.

#### **Paul Cockrell:**

What is your hobby? Have you heard that question when you got learners? We believe that that problem was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you know that little person just like reading or as studying become their hobby. You must know that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your current teacher or lecturer. You get good news or update about something by book. Numerous books that can you choose to use be your object. One of them is niagra Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison (The David Hume Series).
