Real World Nursing Survival Guide: Hemodynamic Monitoring, 1e (Saunders Nursing Survival Guide) Rebecca K. Hodges RN CCRN, Kitty Garrett MSN RN CCRN, Cynthia C. Chernecky PhD RN CNS AOCN FAAN, Lori Schumacher RN MS CCRN

The latest title in the Real World Nursing Survival Guide series, this fun and engaging book makes it easy to review must-know concepts associated with hemodynamic monitoring. Its lighthearted, cartoon-filled approach guides readers through challenging concepts and procedures. The book begins with an overview of five main concepts: cardiac output, stroke volume, preload, afterload, and contractility. It discusses equipment used for specific procedures, followed by discussions of specific aspects of hemodynamic monitoring including cardiac output, intra-arterial, central venous, pulmonary artery, and mixed venous oxygenation. The final chapter focuses on clinical applications with case studies, clinical interventions, and exercises.

- The unique presentation of content narrows the gap between the knowledge a student learns during nursing school and the wisdom they need to survive in the real world.
- Material is presented using adult learning principles and various active-learning strategies to engage readers of all ages, backgrounds, and learning styles.
- A consistent chapter format - using the headings What it is, What you need to know, What you do, and Do you understand? - breaks down information into small segments and facilitates understanding.
- Special icons for Lifespan Considerations, Cultural Implications, Web Links, Cautions, Monitoring and Initial Treatment help readers quickly identify special content in the chapter.
- A variety of memory-reinforcing activities such as mnemonic devices, fill-in the blank, matching, word jumbles, true/false, and crossword puzzles promote learning and understanding.
- Clinical terms and shorthand expressions are highlighted in colored text within parentheses after the explanation, to expose readers to terminology used in the practice setting.
- Boxed Take Home Points distill years of nursing experience into practical, "real world" advice from the experts.
- More than 100 NCLEX-style questions, divided by chapter, are included in a section at the end of the book so readers can test their knowledge and review challenging concepts.
- Full-color illustrations demonstrate key concepts and principles of hemodynamic monitoring, including various complications.
- Original cartoon-character illustrations and a cartoon camel walk readers through subjects that nursing students have identified as difficult, using a lighthearted approach.
- Waveforms at the end of each chapter allow readers to practice their interpretation.

From reader reviews:

Grace Robinson:

In this 21st century, people become competitive in every way. By being competitive currently, people have to do something to make them survive, being in the middle of typically the crowded place and notice simply by surrounding. One thing that at times many people have underestimated this for a while is reading. That's why, by reading a guide your ability to survive improve then having chance to stay than other is high. To suit your needs who want to start reading the book, we give you this specific Real World Nursing Survival Guide: Hemodynamic Monitoring, 1e (Saunders Nursing Survival Guide) book as beginner and daily reading guide. Why, because this book is greater than just a book.

Stephen Stovall:

Reading a book tends to be new life style with this era globalization. With reading through you can get a lot of information that could give you benefit in your life. Having book everyone in this world could share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on earth always try to improve their skill in writing, they also doing some investigation before they write on their book. One of them is this Real World Nursing Survival Guide: Hemodynamic Monitoring, 1e (Saunders Nursing Survival Guide).

Willie Collins:

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. In order to try to find a new activity that's look different you can read a new book. It is really fun for you. If you enjoy the book that you just read you can spent all day long to reading a e-book. The book Real World Nursing Survival Guide: Hemodynamic Monitoring, 1e (Saunders Nursing Survival Guide) it is very good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. In the event you did not have enough space to develop this book you can buy often the e-book. You can more easily to read this book from the smart phone. The price is not very costly but this book features high quality.

Tanya Caggiano:

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library in order to make summary for some publication, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that examining is not important, boring as well as can't see

colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Real World Nursing Survival Guide: Hemodynamic Monitoring, 1e (Saunders Nursing Survival Guide) can make you truly feel more interested to read.
