Biological Neural Networks: Hierarchical Concept of Brain Function

Konstantin V. Baev

Biological Neural Networks: Hierarchical Concept of Brain Function Konstantin V. Baev

This book is devoted to a novel conceptual theoretical framework of neuro science and is an attempt to show that we can postulate a very small number of assumptions and utilize their heuristics to explain a very large spectrum of brain phenomena. The major assumption made in this book is that inborn and acquired neural automatisms are generated according to the same functional principles. Accordingly, the principles that have been revealed experimentally to govern inborn motor automatisms, such as locomotion and scratching, are used to elucidate the nature of acquired or learned automatisms. This approach allowed me to apply the language of control theory to describe functions of biological neural networks. You, the reader, can judge the logic of the conclusions regarding brain phenomena that the book derives from these assumptions. If you find the argument flawless, one can call it common sense and consider that to be the best praise for a chain of logical conclusions. For the sake of clarity, I have attempted to make this monograph as readable as possible. Special attention has been given to describing some of the concepts of optimal control theory in such a way that it will be understandable to a biologist or physician. I have also included plenty of illustrative examples and references designed to demonstrate the appropriateness and applicability of these conceptual theoretical notions for the neurosciences.

From reader reviews:

William Barnett:

Spent a free time and energy to be fun activity to complete! A lot of people spent their free time with their family, or their own friends. Usually they doing activity like watching television, planning to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to consider look for book, may be the guide untitled Biological Neural Networks: Hierarchical Concept of Brain Function can be fine book to read. May be it might be best activity to you.

Andrew McConnell:

Do you have something that that suits you such as book? The guide lovers usually prefer to opt for book like comic, brief story and the biggest you are novel. Now, why not striving Biological Neural Networks: Hierarchical Concept of Brain Function that give your satisfaction preference will be satisfied by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world far better then how they react when it comes to the world. It can't be stated constantly that reading routine only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start studying as your good habit, you can pick Biological Neural Networks: Hierarchical Concept of Brain Function become your personal starter.

Samantha Green:

Beside that Biological Neural Networks: Hierarchical Concept of Brain Function in your phone, it could give you a way to get nearer to the new knowledge or facts. The information and the knowledge you can got here is fresh from the oven so don't possibly be worry if you feel like an aged people live in narrow small town. It is good thing to have Biological Neural Networks: Hierarchical Concept of Brain Function because this book offers for your requirements readable information. Do you often have book but you rarely get what it's facts concerning. Oh come on, that would not happen if you have this in the hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. So do you still want to miss this? Find this book and also read it from right now!

Ronald Kleiman:

Some individuals said that they feel uninterested when they reading a publication. They are directly felt that when they get a half elements of the book. You can choose the book Biological Neural Networks: Hierarchical Concept of Brain Function to make your reading is interesting. Your own skill of reading expertise is developing when you including reading. Try to choose easy book to make you enjoy you just read it and mingle the idea about book and looking at especially. It is to be first opinion for you to like to open a book and go through it. Beside that the book Biological Neural Networks: Hierarchical Concept of

Brain Function can to be your new friend when you're really feel alone and confuse in doing what must you're doing of these time.
