Einstein Was Wrong!: But So Was Newton Martin O. Cook

Modern Physics is built on an erroneous foundation. If we are to take physics to a new level where gravity can be explained from an atomic/quantum perspective, then someone must boldly say, "Einstein was wrong, but so was Newton." Because they both started with the same wrong premise, their theories of gravity were destined to fall short in any attempt to connect them to atomic/quantum processes. And the same false premise that stifled Einstein in his ability to connect "the movement of planets and stars with the tiniest subatomic particles" prevents modern physicists from explaining the fourth and final force from an atomic/quantum perspective. Alas, "...when one starts with a wrong premise, no amount of patching can right the problem." But all is not lost. By correcting Newton's mistake (the wrong premise), a new foundation for understanding the role of the atom in the momentum, relativity, and gravity of masses emerges in the form of two new theories: The Atomic Model of Motion (AMM) and The Galaxy Gravity Cycle (GGC). These two theories combine to paint the big picture of how atomic/quantum processes are involved in holding a galaxy together, keeping planets orbiting stars, and preventing people from floating off into space. This book is dedicated to Occam's razor.

From reader reviews:

Seth Sawyer:

Reading a guide can be one of a lot of action that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new info. When you read a reserve you will get new information mainly because book is one of many ways to share the information or perhaps their idea. Second, studying a book will make you actually more imaginative. When you reading through a book especially fictional works book the author will bring that you imagine the story how the characters do it anything. Third, you may share your knowledge to other people. When you read this Einstein Was Wrong!: But So Was Newton, it is possible to tells your family, friends as well as soon about yours reserve. Your knowledge can inspire the others, make them reading a book.

Ezra Talbott:

In this time globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Often the book that recommended for you is Einstein Was Wrong!: But So Was Newton this book consist a lot of the information with the condition of this world now. This specific book was represented so why is the world has grown up. The words styles that writer value to explain it is easy to understand. Often the writer made some exploration when he makes this book. Honestly, that is why this book suited all of you.

Daniel Gomez:

Within this era which is the greater man or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple approach to have that. What you should do is just spending your time not much but quite enough to enjoy a look at some books. Among the books in the top list in your reading list will be Einstein Was Wrong!: But So Was Newton. This book and that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking upward and review this reserve you can get many advantages.

Curtis Phillips:

What is your hobby? Have you heard which question when you got college students? We believe that that concern was given by teacher to their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person like reading or as reading become their hobby. You need to understand that reading is very important and also book as to be the issue. Book is important thing to include you knowledge, except your personal teacher or lecturer. You see good news or update about something by book. Different categories of books that can you go onto be your object. One of them are these claims Einstein Was Wrong!: But So Was Newton.
