- data for every month of the year
- **searchable electronic reference source**
- video clips of Beaufort Sea States

Exclusively for this product, the raw **GEOSAT data** has been processed to eliminate errors and to calibrate measurements with *in situ* readings. The data is further manipulated to provide a unique dataset of monthly-mean values for wind and wave parameters:

- **wind speed**
- **wind speed exceedence**
- **wind direction**
- **wave height**
- **wave height exceedence**

The parameters are displayed as **colour contour Charts** or as **Graphs** along any user-selected route.

## **Charts**

- Interactive **global ocean coverage**
