Cancer Management in Man: Biological Response Modifiers, Chemotherapy, Antibiotics, Hyperthermia, Supporting Measures (Cancer Growth and Progression)

This volume, the last in this series on cancer growth and progression, is a companion volume to Volume IX and summarizes further explored established and novel approaches for the therapy of patients with malignant neoplasms. The strategies reflected in these volumes are direct extrapolations from the basic science of cancer biology, growth and progression described in earlier volumes of this series. Some of the approaches are directed towards the eradication or modification of the cancer patient, while others are directed towards modification of the host and friends of the cancer patient have to bear. It is clear that important advances in the basic science of tumor immune reactivity.
