Extreme Weather Events and Public Health Responses

Extreme Weather Events and Public Health Responses

on the environment and actively to reduce the burden of mortality and disease on human populations and ecosystems. There is no time for complacency. Actions must be taken urgently to protect the environment of Europe and assure the health of its citizens. 1 Executive Director, European Environment Agency 2 Director, Special Programme on Health and Environment, WHO Regional Office for Europe 00_weather 00_weather events_neu. indd XVIII events_neu. indd XVIII 22. 06. 2005 22. 06. 2005 13:01:07 13:01:07 Editorial 'Si le respect de l'homme est fondé dans le cœur des hommes, les hommes finiront bien par fonder en retour le système social, politique ou économique qui consacrera ce respect' "Lettre à un otage," Antoine de Saint-Exupéry The global climate is changing. During the last 100 years warming has been observed in all continents with an average increase of 0.6–0.2°C (mean SD) in the course of the 20th century. The greatest temperature changes occurred at middle and high latitudes in the northern hemispheres. The trend towards warmer average surface temperatures for the period since 1976 is roughly three times that of the past 100 years as a whole. In the last decades warming seems to be attributable to human activities (man-made environmental changes) like land-use changes, deforestation, urbanisation and the reduction of wetlands. Global climate change is likely to be accompanied by an increase in frequency and intensity of extreme weather events.
